SUMMARY

Software Engineer with 1+ year building production AI and platform systems at a startup. Architected a **production RAG copilot** with LangGraph (hybrid search, multi-model, streaming) on AWS ECS — drove **200%+ lead growth** and **100+ ICP customers**. Built multi-tenant GraphQL APIs, offline-first systems, and Terraform-managed cloud infrastructure.

EXPERIENCE

Software Development Engineer
Zotok.ai

Jan 2025 – Present
Hyderabad, India

- Architected and shipped an **AI sales copilot** that attracted **100+ ICP customers**, increased daily leads by **200%+**, and drove enterprise demo bookings — the company's primary growth engine.
- Built end-to-end **RAG pipeline**: designed OpenSearch indices, wrote data ingestion workflows for 1024-dim vector embeddings (AWS Bedrock), and implemented **hybrid retrieval (KNN + BM25)**.
- Engineered a **multi-graph LangGraph architecture** with modularized agent nodes; implemented **4 streaming strategies** and a **model-switching layer** across GPT-4o-mini, Gemini Flash, and Flash Lite.
- Self-hosted LangGraph on **AWS ECS** with FastAPI, **S3 + CloudFront CDN** for chatbot delivery, and **Terraform-managed infrastructure** spanning ECS, RDS, SQS, SNS, DynamoDB, Amplify, and Secrets Manager.
- Designed a **multi-tenant GraphQL layer** (Hasura + NestJS proxy) with dynamic schema generation and query guards; built WhatsApp message flows via **SQS/SNS, DynamoDB Streams**, and WAHA server.
- Led full-stack build of the **Typebot Builder**: complex multi-group connection UI shipped in **one day**; **Next.js 14 auth middleware**, Prisma + MySQL RDS user management, and **tRPC** handlers with Zod validation.
- Built an **offline-first architecture** (Service Workers, custom caching, background sync) reducing bundle from **100+ MB to 15 MB**; added **Module Federation lazy chunking** cutting cold-start latency by **60%**; implemented a **custom priority queue** handling **200+ queued API calls**.
- Debugged production **Caddy server** stream issues via SSH into EC2; managed EventBridge, Lambda, Firebase handlers; owned end-to-end **CI/CD** cutting release cycles by **35%**.

PROJECTS & WRITING

- **PR Manager** (Go, GitHub APIs, Actions) — CLI tool automating PR workflows: review assignment, merge queuing, and cross-platform binary releases.
- **Terminal Portfolio** (Go, BubbleTea, Wish, Lipgloss) — SSH-accessible TUI portfolio with multi-tab navigation, YAML-driven content, **SQLite visitor analytics**, and live presence tracking. Deployed on **AWS EC2** with GitHub Actions CI/CD and hot-deploy via SCP + systemd.
- **Technical Writing** — Secure Remote SSH via Self-Hosted VPN on AWS[↗] and articles on system security, networking, and cloud infra.

TECHNICAL SKILLS

Languages: TypeScript, Python, Go, Rust, JavaScript, SQL, Bash

AI / LLM: LangGraph, LangSmith, AWS Bedrock, RAG Pipelines, Vector Embeddings, OpenSearch (KNN + BM25), Multi-Agent Systems

Backend: Node.js, NestJS, FastAPI, Hasura, GraphQL, tRPC, Prisma, Zod, REST & Streaming APIs

Infrastructure: AWS (ECS, EC2, S3, CloudFront, Amplify, RDS, SQS, SNS, DynamoDB Streams, EventBridge, Lambda, Secrets Manager, Bedrock), Terraform, Docker, Caddy

Frontend: React, Next.js 14 (SSR / RSC / Page Router), Service Workers, Module Federation, Redux Toolkit, Tailwind

Databases: PostgreSQL, MySQL, Redis, DynamoDB, MongoDB, OpenSearch, Firebase

EDUCATION

College of Engineering Pune (COEP Technological University)
B.Tech in Mechanical Engineering

2020 – 2024
