Technical Skills

AI/LLM: LangGraph, LangChain, RAG Pipelines, OpenSearch (KNN + BM25), Multi-Agent Orchestration

Languages: Go, Python, TypeScript, JavaScript, SQL, Bash

Backend: REST APIs, Microservices, FastAPI, NestJS, Node.js, API Gateways (KrakenD), Event-driven Architecture (SQS, SNS, DynamoDB Streams), Temporal Workflows

Databases: PostgreSQL, MySQL, Redis, DynamoDB, OpenSearch, MongoDB

Infrastructure: AWS (ECS, EC2, RDS, SQS, SNS, DynamoDB, Lambda, Secrets Manager, CloudWatch), Terraform, Docker, Kubernetes, GitHub Actions

Concepts: System Design, Distributed Systems, Concurrency, Multi-Tenant Architecture, Secure Coding, SOLID, Resiliency Patterns

Frontend: React, Next.js 14, TypeScript, GraphQL, tRPC

Experience

Software Development Engineer

Zotok.ai

Jan 2025 – Present

Hyderabad, India

- Designed **Temporal workflows with customized templates** to orchestrate agent-driven business processes; built APIs to deploy agents with **customized guidance prompts**, enabling tenant-specific behavior.
- Architected an **agentic AI copilot** (FastAPI + LangGraph) that increased daily sales leads by **200%+**; implemented 4 streaming strategies (SSE, AG-UI, LangGraph multi-mode).
- Owned **AWS infrastructure via Terraform** (ECS Fargate, RDS, SQS, SNS, DynamoDB, Secrets Manager, ElastiCache/Valkey); maintained GitHub Actions CI/CD with automated integration tests, cutting release cycles by **35%**.
- Built and owned a **Go-based API gateway** routing traffic across **12 microservices** — implemented auth middleware, rate limiting, and request routing with full KrakenD configuration; applied concurrency patterns to handle high-throughput routing safely.
- Built a **RAG pipeline** with OpenSearch KNN + BM25 hybrid retrieval, Redis + PostgreSQL (RDS) dual-layer storage, and CloudWatch metrics and structured logging for observability.
- Migrated **Webpack module-federation microfrontends to Vite** with a custom build runtime in NX: build times/latencies down **70%**, dev build + local startup down **80%** (with HMR).

Projects & Writing

- **zo-ai Conversation Threader** (Python, OpenSearch, Spark, S3 Tables) — Built the OpenSearch-backed dataset backbone for a copilot service: clustered non-contiguous WhatsApp messages into chronological threads using temporal proximity and semantic similarity, classified each thread into query types, and indexed semantic embeddings for hybrid search retrieval of actionable items.
- **PR Manager**  (Go, GitHub APIs, GitHub Actions) — CLI tool automating end-to-end PR workflows: reviewer assignment, merge queuing, status checks, and cross-platform binary releases via **GitHub Actions CI/CD**.
- **Terminal Portfolio**  (Go, BubbleTea, Wish, Lipgloss, AWS EC2) — SSH-accessible TUI at ssh.portfolio.mayurathavale.com with multi-tab navigation, SQLite visitor analytics, and live presence tracking. Deployed on **AWS EC2** with **GitHub Actions** hot-deploying via SCP and systemd.
- **Technical Writing** — Published articles on system security, cloud infrastructure, and networking on [Medium](https://medium.com) , including self-hosted VPN tunneling on AWS.

Education

College of Engineering Pune (COEP)

B.Tech

2020 – 2024
